

Obioma Chibueze Justice

WEB DEVELOPER & PRODUCT BUILDER

Lagos, Nigeria · +234 913 305 8119 · Obiomachibuezejustice@gmail.com

github.com/Justixxprime · linkedin.com/in/chibueze-obioma · justixxprime.github.io/portfolio

SUMMARY

Dual track professional combining a BSc in Biochemistry with completed frontend web development training. Builds responsive, production grade websites with HTML, CSS, Tailwind CSS, JavaScript, React, and Supabase, with eleven client and personal projects managed end to end from design through launch, several with realtime data, PWA installability, and live payment integration shipped as continuous updates rather than one off builds. Brings four years of hands on experience in clinical laboratory science and health insurance operations. Seeking technical, scientific, or operational opportunities, locally or internationally, on site, hybrid, or fully remote.

CORE SKILLS

Web development

HTML, CSS, Tailwind CSS, JavaScript, React, Vite. Supabase for realtime data, auth, storage, and Postgres row level security. Serverless functions on Vercel. Live payment integration with Paystack, including webhook confirmed checkout and refund handling. PWA install flows, offline queues, and push notifications. Responsive, mobile first, cross browser design. Git and GitHub version control, deployment on Netlify, Vercel, and GitHub Pages. End to end project ownership from scoping to launch and ongoing iteration.

Science and healthcare operations

Biochemical assays, hematological evaluation, and microbiological culture. Phlebotomy and specimen collection and processing. Quality assurance and SOP or regulatory compliance. Patient enrollment, claims review, and provider liaison. Data collection, analysis, and reporting through EHR and lab software.

EXPERIENCE

Social Media Manager Jun 2026 to Present

First Experts Logistics Solutions Limited, Ikeja, Lagos

- Manage and grow the company's presence across Instagram, X, Facebook, LinkedIn, and TikTok, building a digital footprint largely from scratch.
- Create and schedule content around the company's services: freight forwarding, customs clearance, air and sea cargo, and door to door delivery.
- Rebuilt the company website, firstexpertslogistics.com, from an outdated WordPress build into a modern, responsive site, and continue redesigning it in phases while managing design through deployment independently.

Freelance Web Developer 2025 to Present

Self employed, Lagos, Nigeria

- Design and develop responsive, multi page websites for independent clients across e commerce, hospitality, brand identity, productivity software, nonprofit, and healthcare or corporate sectors.
- Manage projects end to end, from layout and content structure to responsive styling, testing, and deployment, across eleven live builds to date, several with continuous post launch feature updates.
- Built and continue to maintain a full production e commerce platform for a fashion retail client, and a portfolio site for a developmental support specialist, owning structure, layout, and iterative design refinement.
- Handle client acquisition and outreach independently, including marketing services via social media.

NYSC, Provider Service Officer (PSO) May 2023 to Jul 2024

Rauf Aregbesola Health Center, Lagos State Health Insurance Agency (LASHMA)

- Served as key liaison between healthcare providers and LASHMA, ensuring timely, accurate communication on insurance protocols and patient care.
- Guided patients through enrollment, eligibility, and benefits, improving access to healthcare services.
- Reviewed patient services and claims for compliance, resolving discrepancies with empathy and professionalism.

Laboratory Scientist Apr 2021 to May 2023

God Own Hospital, Oshodi, Lagos State

- Conducted biochemical assays, hematological evaluations, and microbiological cultures to support accurate diagnoses.
- Drew blood samples from patients and performed phlebotomy as required, alongside specimen handling and processing.
- Maintained laboratory equipment through routine calibration and troubleshooting, and implemented quality control measures in line with regulatory standards.

Laboratory Intern Sep 2019 to Mar 2021

Paelon Memorial Hospital, Victoria Island, Lagos

- Gained hands on experience in specimen collection, processing, and biochemical testing under senior supervision.
- Supported quality assurance activities, contributing to reliable and accurate test results.

PROJECTS

Victorious Concept victorious-concept.vercel.app

React, Vite, Tailwind CSS, Supabase, Paystack

A full production e commerce storefront for a fashion retail client, still actively in development. Full shopping flow with category filters, cart, wishlist, and a multi step checkout wired to Paystack for real payment. Customer accounts with order history and tracking, plus an admin dashboard backed by a real Supabase database, not client side storage.

Teaching Portfolio justixxprime.github.io/teaching-portfolio

HTML5, hand rolled CSS system, JavaScript, Decap CMS, Cloudflare

A calm, editorial portfolio site for a specialist working one to one with children with autism, Down syndrome, and developmental delays. Designed the entire tone and pacing to reassure an anxious parent on the first screen, with a gated private portfolio area kept separate from the public case history.

Boardly justixxprime.github.io/boardly

HTML5, CSS3, JavaScript, Supabase, Groq AI

A kanban style productivity application built and deployed as a real working tool, not a static demo, with data persistence and multi device sync through Supabase, installable as a full PWA. Drag and drop board with columns, calendar view, levels, streaks, and a Groq powered AI assistant for task suggestions and a daily digest. Real time multi board sync across devices, checklists, recurring tasks, file attachments, an offline queue, and public share links. Shipped a real alerts system with a loud in app alarm and timezone correct reminders, plus vertical specific modes: a Logistics Control Tower, a Classroom mode, a Dispatch mode, and a Client Portal for sharing progress outside the team.

Fernhollow justixxprime.github.io/fern hollow-booking-website

HTML5, CSS3, JavaScript, Web Audio API

A boutique forest cabin and lodge booking platform covering the full guest journey from discovery to confirmation, spanning nearly 30 pages. Stay search, side by side comparison, a custom built date picker, gift cards, a rewards program, and a host facing dashboard. Ten no paid API features built on real math and browser capabilities, including a solar position sunrise and sunset countdown, an ambient soundscape synthesized live with the Web Audio API, a speech narrated walkthrough, and a rule based concierge, each clearly labeled for what it actually is.

Amani Community Trust justixxprime.github.io/amani-community-trust

HTML5, CSS3, JavaScript, Web3Forms

A concept nonprofit website with a full information architecture: a hero stating registered status and founding year, quick links into Education, Health Outreach, and Economic Empowerment, and a trust strip showing partner organizations. A four step donation flow with progress tracking, a nine article field journal, and volunteer sign up. Fully animated and installable as a progressive web app, with its full styling system compiled into a local file rather than an external CDN dependency.

Stride justixxprime.github.io/stride

HTML5, CSS3, JavaScript

A shoe brand concept demonstrating how far a complete e commerce experience can be taken with plain HTML, Tailwind CSS, and hand written JavaScript, no framework and no backend. Full shopping flow including product catalog, cart, multi step checkout, account pages, and a build your own sneaker configurator with layered, swappable parts.

Pulse Analytics Dashboard justixxprime.github.io/pulse-analytics-dashboard

HTML5, CSS3, JavaScript

An e commerce admin dashboard built to look and behave like production software a real store owner would use daily. KPI summary cards and animated charts for at a glance performance tracking, searchable and sortable views for orders, customers, discounts, and content, and a command palette for fast, keyboard driven navigation.

First Experts Logistics Solutions firstexpertslogistics.com

HTML5, CSS3, Tailwind CSS, JavaScript

Full website rebuild for a Lagos based freight forwarding and customs clearance company, replacing an outdated WordPress site with a modern, responsive build from the ground up. Service pages covering freight forwarding, customs clearance, air and sea cargo, and door to door delivery. Built and deployed independently end to end, now spanning 24 pages with a real four post blog and a shipment tracking page.

ShelemJ Resources Limited justixxprime.github.io/shelemj-website

HTML5, CSS3, Tailwind CSS, JavaScript

A 21 page website for a Lagos based African food export company established in 2013, built to a luxury black and gold brand aesthetic. Full site architecture spanning service pages, product listings, and a three article blog. Added Organization and FAQPage structured data for richer Google search results, ran real WCAG contrast ratio audits and fixed two genuine AA failures, and rebuilt every favicon and social share image from the client's actual logo.

Cheliv Compassionate Care Plus Inc. chelivcompassionatecareplusinc.vercel.app

HTML5, CSS3, JavaScript, React

Multi page marketing website for a home healthcare provider, built during training in 2025 and designed to feel trustworthy and easy to navigate for visitors who may be stressed or in a hurry. Service pages and disease management program listings, plus a working request information intake form connecting visitors directly to the care team.

E Commerce Showcase Site [self directed, built during training, 2025](#)

HTML5, CSS3, JavaScript

A self directed storefront project built to sharpen frontend fundamentals rather than for a client. Clean, structured product layout with a shopping experience tuned for both phone and laptop.

EDUCATION

Frontend Web Development [Completed Jan 2026](#)

Digital Fortress Institute, Lagos, Nigeria

Completed hands on training in HTML5, CSS3, Tailwind CSS, JavaScript, and React, and built and deployed a responsive e commerce site as a capstone project.

BSc Biochemistry, Second Class Lower (2:2) [2014 to 2018](#)

Abia State University, Uturu, Nigeria

Coursework in organic chemistry, molecular biology, enzymology, and metabolic pathways, with laboratory research on enzymatic reactions and biochemical assays.

Senior Secondary Certificate Examination (SSCE) [2013](#)

Titus Jane High School, Lagos, Nigeria, West African Examinations Council (WAEC)

CERTIFICATIONS

- Frontend Web Development Certificate, Digital Fortress Institute, January 2026
- National Youth Service Corps (NYSC) Certificate, 2023 to 2024

ADDITIONAL INFORMATION

Writing: Field notes on the projects on this page at justixxprime.github.io/portfolio/notes.html, including how Boardly's backend actually works and what moving from a hospital lab into code taught me about writing better code.

Languages: English, fluent, professional and conversational.

Availability: Immediate, alongside current freelance and social media management commitments.

Work eligibility: Eligible to work in Nigeria, open to relocation and international remote work.

References available upon request.
